

Memorandum

TO: Eric Maher and Safouh Sayed, Department of Toxic Substances Control **DATE:** October 12, 2010
CC: Steve Howe, Project Navigator
FROM: Crysta Dickson, PCR Services Corporation
RE: **FENCE MONITORING FOR THE ASCON LANDFILL PROJECT SITE, CITY OF HUNTINGTON BEACH, ORANGE COUNTY, CALIFORNIA**

PCR Services Corporation (PCR) biologist Crysta Dickson conducted the weekly fence monitoring for the ASCON landfill project site on October 5, 2010. Ms. Dickson was escorted by Bill Hodges of Geosyntec.

The entire project site was driven and all fencing (both construction and chain-linked) was inspected to ensure fencing was intact and no impacts have occurred to the disturbed coastal salt marsh or southern tarplant (*Centromadia parryi* ssp. *australis*) populations to be avoided and preserved.

All fencing was intact at the time of inspection, and no damage to tarplant or the disturbed coastal salt marsh was observed.
