

Memorandum

TO: Guenther Moskat, Greg Holmes, and Safouh Sayed,
Department of Toxic Substances Control

DATE: February 15, 2011

CC: Steve Howe, Project Navigator

FROM: Crysta Dickson, PCR Services Corporation

RE: **FENCE MONITORING FOR THE ASCON LANDFILL PROJECT SITE, CITY OF HUNTINGTON BEACH,
ORANGE COUNTY, CALIFORNIA**

PCR Services Corporation (PCR) biologist Crysta Dickson conducted the weekly fence monitoring for the ASCON landfill project site on February 15, 2011. Ms. Dickson was escorted by Steve Howe of Project Navigator, Ltd. and Bill Hodges of Geosyntec.

The entire project site was driven and all fencing (both construction and chain-linked) was inspected to ensure fencing was intact and no impacts have occurred to the disturbed coastal salt marsh or southern tarplant (*Centromadia parryi* ssp. *australis*) populations to be avoided and preserved.

At the time of the inspection, all fencing was intact and no damage to the disturbed coastal salt marsh or southern tarplant was observed.
