Subject: Ascon Landfill Site Interim Removal Measure (IRM)
CDP 09-07 – Hamilton Avenue Pavement Survey

Dear Ms. Urashima:

This letter is in regards to the recently performed Hamilton Avenue pavement evaluation, jointly performed by the Ascon team and City staff for the above referenced project.

The City's Public Works Department has reviewed the "Ascon Hamilton Ave. Comparison Photos" file provided to our office, with comparison photos of the Pre-IRM (July 29, 2010) and Post-IRM (March 22, 2011) pavement conditions along the project haul route on Hamilton Avenue, and has concluded that the pavement condition is unchanged and therefore will require no rehabilitation as a result of the applicant's operations.

This concludes and satisfies Item No. 4 of the project's Condition of Approval.

If you have any further questions, please contact me at (714) 374-1735.

Sincerely,

Bob Milani, PE
Senior Civil Engineer
